

OPEN Data API Source

Prague City Data Congress 2019

Jakub Nešetřil

**OPEN DATA
IS LIKE
BASIC RESEARCH**

It doesn't seem useful *at first*

Value comes *eventually* from applications

You never know *when*, so you have to trust

GoodData

Nobody understands their data
until they see it (used)

apiary

Unlike data, software is a
creative process

Creating applications on top of
Open Data requires invention.

Extending Open Source doesn't.
